Forward-Looking Statements and Non-GAAP Reconciliations

This presentation, our Annual Report on Form 10-K for the year ended December 31, 2018 and our other filings from time to time with the Securities and Exchange Commission contain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. From time to time, we also provide forward-looking statements in other materials we release as well as oral forward-looking statements. Statements regarding our intent, belief and current expectations about our strategic direction, prospects and future results, and all statements accompanied by terms such as “believe,” “project,” “expect,” “estimate,” “assume,” “intend,” “anticipate,” “target,” “plan,” and variations thereof and similar terms are intended to be forward-looking statements. Such statements give our current expectations or forecasts of future events; they do not relate strictly to historical or current facts. Management believes that these forward-looking statements are reasonable as and when made. However, caution should be taken not to place undue reliance on any such forward-looking statements because such statements speak only as of the date when made. Forward-looking statements are made subject to safe harbor protections of the federal securities laws pursuant to Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934.

Forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our historical experience and our present expectations or anticipated results. These risks and uncertainties include, but are not limited to: changes in general economic conditions, in the U.S. or internationally; significant competition on a local, regional, national, and international basis; changes in our relationships with our significant customers; changes in the complex and stringent regulation in the U.S. and internationally (including tax laws and regulations); increased physical or data security requirements that may increase our costs of operations and reduce operating efficiencies; legal, regulatory or market responses to global climate change; strikes, work stoppages and slowdowns by our employees; the effects of changing prices of energy, including gasoline, diesel and jet fuel, and interruptions in supplies of these commodities; changes in exchange rates or interest rates; uncertainty from the expected discontinuance of LIBOR and transition to any other interest rate or benchmark; our ability to maintain the image of our brand; breaches in data security; disruptions to the Internet or our technology infrastructure; interruption of our business from severe weather or other natural or man-made disasters including terrorism; our ability to accurately forecast our future capital investment needs; exposure to changing economic, political and social developments in international and emerging markets; changes in business strategy, government regulations, or economic or market conditions that may result in substantial impairment of our assets; increases in our expenses or funding obligations relating to employee health, retiree health and/or pension benefits; potential additional tax liabilities in the U.S. or internationally; the potential for various claims and litigation related to labor and employment, personal injury, property damage, business practices, environmental liability and other matters; our ability to realize the anticipated benefits from acquisitions, joint ventures or strategic alliances; our ability to manage insurance and claims expenses; our ability to realize the anticipated benefits from our transformation initiatives; cyclical and seasonal fluctuations in our operating results; and other risks discussed in our filings with the Securities and Exchange Commission from time to time, including our Annual Report on Form 10-K for the year ended December 31, 2018 and our quarterly report on Form 10-Q for the quarter ended June 30, 2019, or described from time to time in our future reports filed with the Securities and Exchange Commission. You should consider the limitations on, and risks associated with, forward-looking statements and not unduly rely on the accuracy of predictions contained in such forward-looking statements. We do not undertake any obligation to update forward-looking statements to reflect events, circumstances, changes in expectations, or the occurrence of unanticipated events after the date of those statements.

Information, including comparisons to prior periods, may reflect adjusted results. See the appendix for reconciliations of adjusted results and other non-GAAP financial measures.
**EPS vs. Adjusted EPS**

*Non-GAAP financial measure. See Appendix for reconciliation to GAAP financial measure.*
Delivered on our commitments

• Revenue growth.

• Improved network efficiency to drive operating leverage.

• Continuous transformation to stay ahead of market changes.

Our multi-year investment strategy is positioning us well to support the needs of our customers, generate profitable revenue growth, reward our shareowners and create opportunities for our employees.
Processed record volume during peak

- Delivered more than **1.6B** packages in the fourth quarter.

- Near **8%** increase in quarterly volume over last year.

- Provided industry-leading, on-time service during peak.

**Our execution benefited from our increased automated capacity, the use of proven tools and technology and deeper collaboration with our customers.**
For the company in the fourth quarter

- Revenue grew **3.6%**.
- Operating profit increased over **6%**, and was up nearly **14%* on an adjusted basis.**
- Margins expanded in all segments.

* Non-GAAP financial measure. See Appendix for reconciliation to GAAP financial measure.
Transformation strategies and investments position UPS to capture opportunity

• Embracing the e-commerce structural shift which brought a surge in Next Day Air volume of more than 22% in 2019.

• Driving productivity gains which generated positive operating leverage in the fourth quarter and for the year.

Our integrated network provides UPS and our customers tremendous flexibility to more efficiently respond to the fast pace of change in the market.
2020 economic backdrop provides opportunities

- Consumer demand remains healthy.
- 2020 Global GDP estimated growth of 2.5%, about same as last year.
  - Slower growth in the first half of the year.
- Advancements with U.S. trade are encouraging:
  - USMCA.
  - U.S.-China phase-one trade agreement.
UPS is taking aggressive steps forward

• Tremendous opportunities amid structural shifts in the market.

• Electing to pull forward SMB initiatives.
  • Speeding up the network.
  • Expanding weekend operations.

UPS continues to introduce new SMB-centric solutions that help them compete and grow.
Enhancing network to enable faster speed to market

• Extended Hours Pickup for Next-Day Ground Delivery to cover 98% of the U.S. population.

• Expanding Saturday services to double the volume we handle and reach an additional **40M** consumers.

• Launching economical Sunday delivery to the majority of the U.S.

Further expanding our new automated capacity by adding 5M square feet to our integrated network.
New solutions for our growing SMB customer base

- Expanding My Choice for Business in 30 countries.
- Enhancing UPS.com to simplify cross-border trade.
- Next-generation technology expansions:
  - UPS Flight Forward at the University of California San Diego health campus.
  - A commitment to purchase 10,000 EV delivery vehicles from Arrival.
  - Deployment of Dynamic ORION in the U.S.
Brian Newman
Chief Financial Officer
4Q19 Financial Highlights

• Results enabled by our strategies, execution and investments.
• Generated positive operating leverage.
• Grew operating profit and margins across all segments.

Full-year EPS of $5.11 per diluted share, and $7.53* on an adjusted basis.

* Non-GAAP financial measure. See Appendix for reconciliation to GAAP financial measure.
4Q19 U.S. Domestic

- U.S. Domestic revenue increased nearly 7%.
- Growth from both B2C and B2B shippers.
- Customer and product mix dynamics decreased revenue per piece 2%.
- U.S. Domestic operating profit increased 7.5%, and more than 20%* on an adjusted basis.

U.S. unit cost decreased, generating positive operating leverage.

* Non-GAAP financial measure. See Appendix for reconciliation to GAAP financial measure.
4Q19 International

- Total export volume down slightly, with gains on intra-Europe, intra-Asia, and U.S. export trade lanes.
- Adjusted global air capacity to match demand.
  - Lowered block hours by about 3%.
- International operating profit increased by more than 2%, and nearly 4%* on an adjusted basis.
  - Operating margin expanded 80 bps, and 110 bps* on an adjusted basis.

Our performance further demonstrates our ability to leverage our capabilities and continuously adapt to grow profit.

* Non-GAAP financial measure. See Appendix for reconciliation to GAAP financial measure.
4Q19 Supply Chain and Freight

- Operating profit increased more than 16%, and up 17%* on an adjusted basis.

- Logistics, UPS Freight and Marken grew revenue and profit in the quarter.
  - Helping offset softer conditions faced by Coyote and Forwarding.

Solid execution resulted in expanded operating margins.

* Non-GAAP financial measure. See Appendix for reconciliation to GAAP financial measure.
**Generated strong cash flow to reinvest and reward**

For the year ended December 31, 2019:

- **$8.6B** in cash from operations and **$4.1B** of adjusted free cash flow.

- **$6.4B CapEx**, and on an adjusted basis **$6.5B** in network investments.
  - CapEx lowered due to increased capital efficiencies.

- Returns to shareowners:
  - About **$1B** in share repurchases.
  - About **$3.3B** in dividends.

* Non-GAAP financial measure. See Appendix for reconciliation to GAAP financial measure.
2019: Strong progress with our transformation

- Continually adjusted our integrated network.
- Generated strong operating leverage.
- Launched numerous SMB solutions.
- Took advantage of the next-day delivery structural change in the market.

**UPS managed a significant increase in annual volume while increasing profit and expanding margins.**
2020 EPS Guidance

2019 Adjusted Earnings per Share (EPS)* $7.53

Operating Profit:
- 2020 Underlying Segment Performance $0.46 - $0.76
- Discount Rate Pension Service Cost ($0.26)
- SMB Initiatives ($0.33)

Total Other Income (Expense)** $0.46
Income Tax Expense ($0.10)

2020 Adjusted EPS*** Guidance $7.76 to $8.06

SMB initiatives are expected to be EPS and margin accretive in 2021.

*Non-GAAP financial measure. See Appendix for reconciliation to GAAP financial measure.
** Because it is not possible to predict, potential impacts of a future pension mark-to-market adjustment are not included.
*** Non-GAAP financial measure.
2020 Outlook

• U.S. revenue expected to increase 4% to 7%.
  • Domestic operating profit should grow in the low-single digit range*.
    • Includes impact from SMB initiatives.
• International will increase revenue 4-6%.
  • Expect to maintain our industry-leading margins*.
• Supply Chain and Freight planning for 4-6% revenue growth.
  • Operating profits projected to grow 5-7%*.

* Non-GAAP financial measure, and on a discount rate neutral basis.
2020 Outlook cont’d

- CapEx is planned to be around $6.7B.
- Adjusted free cash flow anticipated to be $4.3B to $4.7B*.
- Expect growth in dividends (subject to Board approval) and share repurchases of about $1B.

* Non-GAAP financial measure.
Questions & Answers
Reconciliation of GAAP and non-GAAP Financial Measures

Forward-Looking Statements

Except for historical information contained herein, the statements made in this release constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements, including statements regarding the intent, belief or current expectations of UPS and its management regarding the company’s strategic direction, prospects and future results, involve certain risks and uncertainties. Certain factors may cause actual results to differ materially from those contemplated by the forward-looking statements, including changes in economic and other conditions in the markets in which we operate, governmental regulations (including tax laws and regulations), our competitive environment, the facts or assumptions underlying our health and pension benefit funding obligations, the results of negotiation and ratification of labor contracts, the impact of any strikes, work stoppages or slowdowns, and changes in energy and fuel costs, the effectiveness of past restructuring and capital expenditure initiatives, fluctuations in our operating results, and other risks discussed in the company’s Form 10-K and other filings with the Securities and Exchange Commission, which discussions are incorporated herein by reference.

Reconciliation of GAAP and non-GAAP Financial Measures

We supplement the reporting of our financial information determined under generally accepted accounting principles (“GAAP”) with certain non-GAAP financial measures, including, as applicable, “as adjusted” operating profit, operating margin, other income (expense), income (loss) before income tax, diluted earnings per share, and diluted earnings per share excluding certain items. These non-GAAP financial measures provide additional meaningful information to assist users of our financial statements in understanding our results for each reporting period. We believe these non-GAAP measures provide useful supplemental information to our investors. However, these non-GAAP measures are not in accordance with, or are not comparable to, generally accepted accounting principles. Our non-GAAP financial measures may be different from similar non-GAAP financial measures provided by other companies, and measures that we have presented in one of our prior reports. These non-GAAP financial measures are presented here for the purposes of (1) providing additional meaningful information to our investors that may assist them in evaluating our historical operating results and future performance, (2) providing an alternative method of analyzing our results of operations that may, when compared to the corresponding GAAP measures, provide a useful comparison of year-over-year changes in our underlying businesses, and (3) reflecting the manner in which our management presents and assesses our financial performance, including the manner in which the company’s management uses these measures in their decision-making process.

Costs Related to Legal Contingencies and Expenses

We supplement the presentation of our operating profit, operating margin, pre-tax income, net income and earnings per share with similar non-GAAP measures that exclude the impact of costs related to certain of our legal contingencies and expenses. We believe this adjusted information provides a useful comparison of year-to-year financial performance without considering the impact of these contingencies and expenses. We evaluate our performance on this adjusted basis.

Costs Related to Restructuring Programs; Transformation Strategy Costs

We supplement the presentation of our operating profit, operating margin, pre-tax income, net income and earnings per share with similar non-GAAP measures that exclude the impact of costs related to restructuring programs, including Transformation strategy costs. We believe this adjusted information provides a useful comparison of year-to-year financial performance without considering the short-term impact of restructuring costs. We evaluate our performance on this adjusted basis.

Impact of Changes in Foreign Currency Exchange Rates and Hedging Activities

Effective January 1, 2020, we began evaluating our segment results and providing guidance using pension discount rate-neutral operating profit in addition to the GAAP segment operating profit measure. This measure excludes the period over period impact of discount rate changes on pension service cost. We believe pension discount rate-neutral operating profit will allow users of our financial statements to better understand growth trends and expectations in our results by excluding the impact of changes in discount rates.

Pension discount rate-neutral operating profit is calculated by discounting the value of benefits attributable to employee service in a period utilizing the prior period’s discount rate applicable to each of our company-sponsored defined benefit plans. The difference between this derived amount and the reported service cost is the period over period impact of pension discount rate movements on segment operating profit.

Mark-To-Market Pension and Postretirement Adjustments

We recognize gains and losses on plan assets in tax actuarial gains and losses in excess of a 10% corridor for company-sponsored pension and post-retirement obligations immediately as part of net period benefit cost other than service cost. We supplement the presentation of our pre-tax income, net income and earnings per share with similar non-GAAP measures that exclude the impact of the portion of net period benefit cost other than service cost represented by the gains and losses recognized in excess of the 10% corridor and the related income tax effects. We believe excluding these mark-to-market impacts from our adjusted results provides important supplemental information to remove the volatility caused by short term changes in market interest rates, equity prices, and similar factors.

This adjusted net period benefit cost ($754 million in 2019 and $615 million in 2018) is comparable to the accounting for our defined benefit plans in our quarterly reporting under U.S. GAAP, utilizing the expected return on plan assets (7.68% in 2019 and 2018) and the discount rate used to determine net period benefit cost (4.45% in 2019 and 3.81% in 2018). The non-adjusted net period benefit cost reflects the actual return on plan assets (7.67% in 2019 and 2018) and the discount rate used to measure the projected benefit obligation at the December 31 measurement date (3.55% in 2019 and 4.45% in 2018).

The deferred income tax effects of these mark-to-market pension and postretirement adjustments are calculated by multiplying the statutory tax rates applicable to each in a given jurisdiction, including the U.S. federal jurisdiction and various U.S. state and non-U.S. jurisdictions, by the adjustments. The blended average of the statutory tax rates in 2019 and 2018 was 23.9% and 24.0%, respectively.

Free Cash Flow and Adjusted Capital Expenditures

We supplement the reporting of cash flows from operating activities with free cash flow, free cash flow excluding discretionary pension contributions and free cash flow plus principal repayments of capital lease obligations, non-GAAP liquidity measures. We believe these free cash flows provide useful information to our investors. We evaluate our cash flows from operating activities less capital expenditures, proceeds from disposals of property, plant and equipment, and plus or minus the net changes in finance receivables and other investing activities. Free cash flow excluding discretionary pension contributions adds back any discretionary pension contributions made during the period.
